DETAILED ACTION

Drawings

1. The drawings filed on March 10, 1998 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the claims is that the prior art of record, either alone or in any proper combination, does not disclose or fairly suggest the claimed method step of inferring from the temperature of a cylinder head, the engine coolant temperature as a function of the engine rpm's and the cylinder air charge temperature. The prior art does fairly suggest measuring both temperatures (cylinder head and engine coolant) by using two discrete sensors joined together in a single housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
